

Where do I email about features and bugs?

You can join the [community forums](#), where different user questions, feature-requests and bug-reports are discussed among IntelliJ IDEA users and our technical staff.

You can also post feature suggestions and bug reports to the [YouTrack issue tracker](#).

In case of critical bug or problem that needs immediate solution, please contact support@intellij.com or fill in [the support form](#). Double check that your reply-to e-mail address is correct and has no spam filters, otherwise we'll be not able to contact you.

Before e-mailing about a problem it's recommended to check that it's not already submitted to the tracker.
