

What is EAP?

The Early Access Program (EAP) gives you an opportunity to get acquainted with the new version of IntelliJ IDEA being currently under development.

The EAP section of our web-site contains a list of the planned and already implemented features for the next IntelliJ IDEA version. Here you can also download the most recent build, as well as subscribe to the newsgroups where it is recommended to post all the bug-reports and feature-suggestions related to the EAP builds.

To join the Early Access Program of IntelliJ IDEA, please refer to the [IntelliJ IDEA EAP page](#).
