

Visual Studio 2008 crashes when built-in Find/Find in Files (Ctrl+F/Ctrl+Shift+F) functionality is used on Windows XP 64-bit and Windows 2003 Server 64-bit

This is a bug in the Wow64 layer of the Windows OS. For more information, please take a look at the following article: <http://resharper.blogspot.com/2007/12/resharper-and-visual-studio-crash-on.html>
