

Illegal lambda list element

vikram 1 posts since

Hi there

I am executing a lisp file which contains a function

```
;;; Actions and Tests
```

```
(defun dopopactions (regs expr hold star)
  (apply
    (lambda ,(cons 'star (cons 'hold(car regs)))
      ,@actions
      (list
        (list (quote ,(car regs))
              (list ,@(car regs))) hold))
      (cons star (cons hold (cadr regs)))
    )
  )
)
```

Now I am getting an error as

Illegal lambda list element

Illegal lambda list element (CONS 'STAR(CONS 'HOLD(CAR REGS)))

***-Condition of type UNDEFINED-FUNCTION

Hope to get an answer as soon as possible.

Regards,

Vikram Shetty
