

DoubleS Vs. LOP

[Mahmoud Fayed](#) 2 posts since

Aug 1, 2006

Dear LOP authors

i think that LOP is quantum leap in software paradigm, but i suggest that DoubleS (Super Server) paradigm from open source area (<http://www.sourceforge.net/projects/doublesvsoop>) should taken in mind while developing LOP

DoubleS programming paradigm take in mind the most complex features of software program today (complex data structure,event driven system,client server,grid computing,embedded system,.....etc) and the gift is using DoubleS we can develop new programming language 100% without code.

Greetings,

Mahmoud Fayed

Hello,

I downloaded your IDE but I wasn't able to understand anything. I think you tool will be better if your provide more comprehensible.

Konstantin

DoubleS Vs. LOP

Aug 1, 2006 2. Re: **DoubleS Vs. LOP** Aug 3, 2006 7:38 PM

Thanks , for looking at DoubleS Project , if the project is vague , i think this feel will go if you readed the article "DoubleS Paradigm" which lies in PDF file in the project site.

also the introduction lecture "PowerPoint File" will be helpful

also i know that the project need more documentation , i do my best for documenting it , but this need a lot of time.

Greetings,

Mahmoud Fayed
