

ASP.Net app profiling - Just get...

Ashwin 1 posts since

Aug 8, 2006

I know this has been posted before, but I've tried all recommended solutions with no luck. I'm using dotTrace 1.1.2 build 164.5 with IIS v5.1. Everytime I start start profiling I just get the "waiting" message and the "Start Profiling" and "Get Snapshot" buttons are disabled. I've registered the JetBrains.dotTrace.Core.ia32.dll and even reinstalled IIS. Any more ideas out there?

Hello Ashwin,

Please try the latest dotTrace 2.0 EAP build (219). You can download it from <http://www.jetbrains.net/confluence/display/NetProf/Download> and it can be installed side-by-side with your 1.1.2 installation. If the problem occurs with dotTrace 2.0 please send me your log file (at \Application Data\JetBrains\dotTrace2\dotTraceClient.log) by e-mail.

Hello

I've installed the latest version and still get the message "connecting...". I'm trying to profiler a web application.

Can you help me?

Hello Carlos,

- 1) Did you try to register dotTrace core (go in command line to dotTrace installation directory and execute `regsvr32 JetBrains.dotTrace.Core.ia32.dll`

ASP.Net app profiling - Just get...

(or JetBrains.dotTrace.Core.amd64.dll if you have amd 64 machine))?

2) If this doesn't help, could you please send us your dotTrace log file

(at \Application Data\JetBrains\dotTrace2\dotTraceClient.log)

by email?

I have the same problem BUT the profiler works for 2 or 3 times before doing this. after that it shows... connecting

The problem is .NET application cannot load our core dll.

To fix it:

1. As George says: regsvr32 JetBrains.dotTrace.Core.ia32.dll (or JetBrains.dotTrace.Core.amd64.dll for x64 paltforms)
2. Check that you can profile .NET application (for example: dotTrace)
3. Check that your current IIS user (usually Internet Guest Account, but it depends from your ISS authentication method) has the rights to read files from dotTrace folder

ASP.Net app profiling - Just get...
