Hi

ReSharper V3.0.

What do I write in my Actions.xml file to add a action to the View menu in

ReSharper.

Is it something like:

Thanks

Hello Jakob,

How to: Add an action the View menu

You can find some information here:

[http://www.jetbrains.net/confluence/display/ReSharper/Creatingandhandling+actions](http://www.jetbrains.net/confluence/display/ReSharper/Creating+and+handling+actions)

View menu has "ReSharper.View" id in version 3.0. In previous versions, it is not possible to insert action into ReSharper | View menu, due to a conflict between VS's View menu and ReSharper's View submenu.

Sincerely,

Ilya Ryzhenkov

Hello Ilya Ryzhenkov, i use next xml for actions:

Refactor. But

when i call "Refactor This" item present in popup menu.

P.S. Log file contains following

Guest 5. **Re: How to: Add an action the View menu** Jun 18, 2007 12:58 PM

Hello Alexander,

the value has been moved under the key:

HKEY_CURRENT_USER\Software\JetBrains\ReSharper\v3.0\vs8.0.

You can delete all the values under that key and check if it helps.

R

1. reinit. But my action is available in popup menu "Refactor This" only.

Guest 7. **Re: How to: Add an action the View menu** Jun 18, 2007 1:39 PM

Hello Alexander,

I've investigated it and it appears that unfortunately support for Actions.xml of 3rd party plugins is broken in 3.0. I've created a request for it:

<http://www.jetbrains.net/jira/browse/RSRP-43536>

The fix will go into 3.0.1.
