Hi All,

Could you please let me know where can i get the plugins to integrate teamcity with Microsoft Visual Studio.

Many thanks in advance..

Hello,

Please visit "My Settings and Tools" page. The plugin is available for download from that page.

HTH,

KIR

thanks Krill..

DotNet plugin

we have visual studio .net 2003 and .net 2005 both on the development environments.. I could see TeamCity plugin has got integrated with .net 2005 but not with .net 2003. any suggestions here or corrections in my set up.. I simply downloaded the msi, ran it and restarted my machine..

Hi,

Does the Visual Studio plugin for teamcity does not support prior to 2005 edition? When i was attempting to install the plugin on a machine with VS 2003, it threwed me a message saying it can be installaed only on 2005 or 2008 edition..

Please help !!

That's true. TeamCity plugin supports only Visual Studio 2005 and Visual Studio 2008.

It's curious, why do you still use VS 2003? Do you plan any upgrades to newer version of VS?

Thanks Eugene !! Yes, but not know 😞

DotNet plugin

Our co. is fond of VS 2003
