

Build 9164 takes several seconds to...

Rob 285 posts since

Aug 27, 2002

Env: Windows XP, JDK 6u10, 2GB memory, Core 2 DUO

I was previously running build 8995 and when I switched back to IntelliJ the controls responded immediately.

However, with build 9164 about 60% of the time the GUI controls when trying to run say JUnits, or just clicking in an editor window

takes 3-4 seconds to respond. By this I mean before I see a button redrawn as being pushed.

The Memory usage is about 50% of maximum heap. I watched the memory gauge and when the

IntelliJ finally begins to respond I don't see a drop in the memory usage as I would expect after a garbage collection cycle.

Is anyone else seeing this under Windows XP?

Hello Rob,

Please take a CPU snapshot as described in <http://jetbrains.net/devnet/docs/DOC-192>

Env: Windows XP, JDK 6u10, 2GB memory, Core 2 DUO

Build 9164 takes several seconds to...
