

Looking for Runner documentation

[Peter Wolf](#) 51 posts since

Nov 24, 2008

Hello once again,

I have the Lexer, Parser, Syntax Coloring, Error Highlighting, Brace Matching and Folding all working very nicely now. Thank you all again.

Now I would like to enable running my Clojure scripts. However, the "Developing a Custom Language Plugin" document does not talk about this.

Where do I find it? How do I hook up the run/debug/profile buttons for my custom language?

Thanks again

Peter

Hello Peter,

Hello once again,

I have the Lexer, Parser, Syntax Coloring, Error Highlighting, Brace Matching and Folding all working very nicely now. Thank you all

again.

Now I would like to enable running my Clojure scripts. However, the "Developing a Custom Language Plugin" document does not talk about this.

Where do I find it? How do I hook up the run/debug/profile buttons for my custom language?

At the moment there's no high-level overview of the run/debug system, and your best bet is looking at existing custom language plugins and seeing how run/debug is implemented there.
