

resharper.chm - "This program cannot..."

[Steve Shaw](#) 6 posts since

Apr 8, 2009

I downloaded current documentation, and unzipped. I unblocked the .chm file (because a security-blocked file is the normal cause of the message I am getting).

The contents pane does show all the topic pages. But clicking on any page gives the ".. cannot display webpage" message.

resharper.chm is dated 6/10/2008, and is 4,077 KB size.

Any solution for this problem?

UPDATE: The .chm provided with the software works fine -- I found it in Program Files / JetBrains etc.

So webmaster needs to replace the old one on the website with the current one.

Ilya -- Thank you for the webhelp link; that works for me.

Also please note that

<http://www.jetbrains.com/resharper/docs/resharper-help.zip>

is the file that didn't work for me.

It is listed as "ReSharper 4.0 Help", the link labeled "download", on page

<http://www.jetbrains.com/resharper/documentation/documentation.html>

Steve

Another possible cause for this kind of behaviour is storing help in a Windows shared folder.

Hello Adam,

Try to look in this fix - <http://grounding.co.za/blogs/brett/archive/2007/10/10/fixing-quot-this-program-cannot-display-the-webpage-quot-error-for-chm-files.aspx>

Or looking for a solution in the google by: CHM AND "This program cannot display the webpage"

Best regards,

Alexander Nesterenko
