Last : there seem to be a failure while trying to copy files from one side of the comparison to the other side.

Compare Directories plugin exception

The file concerned exist only in one side, and directories for it have been correctly created, but the file itself wasn't.

When trying to copy I get the following message "Erreur inattendue pendant la copie de fichier : certains fichiers n'ont pas pu être écrasés.", however the destination folder is empty

Hello Thibaut,

I couldn't reproduce all these issues on my machine, but I think I could fix them all.

Can you please download [this next plugin version](#) and check if it does indeed? Then I can publish it on the IDEA plugin repository.

Thanks,

Olivier.

I actually did solve most of them too, but our changes are quite different.

I attach the sources of my patched up version
