Hi,

I did this update yesterday and since then I cannot even start IntelliJ. I have a Mac Book Pro with Mac OS X 10.5.7. This is the java version it's running:

```
java version "1.6.0_13"
```

```
Java(TM) SE Runtime Environment (build 1.6.0_13-b03-211)
```

```
Java HotSpot(TM) 64-Bit Server VM (build 11.3-b02-83, mixed mode)
```

Did someone have the same problem please?

I have seem that there were problems before with other updates:

<http://www.jetbrains.net/devnet/thread/277476>

Thanks and Regards,

Juan

I had these error messages in the Java console:

IntelliJ 8.1 buuild 9732 hangs with...

16/06/2009 10:29:43 [0x0-0x28028].com.jetbrains.intellij[240] [JavaAppLauncher Error] This process is [i386] and was re-exec'd from [i386], but for some reason we are trying re-exec to [].

IntelliJ 8.1 buuild 9732 hangs with...

Thanks a lot Leszek, it works for me now.

In case it is useful, what I have done is:

I deleted the idea file in:

`/Applications/IntelliJ IDEA 8.1.app/Contents/MacOS`

then `cp /System/Library/Frameworks/JavaVM.framework/Resources/MacOS/JavaApplicationStub64 to /Applications/IntelliJ IDEA 8.1.app/Contents/MacOS/`

and renamed `JavaApplicationStub64` to `idea` again.

Best regards,

Juan

Thanks!!!

IntelliJ 8.1 build 9732 hangs with...

It works. 😊
