When I try to update my plugin on [plugins.intellij.net](http://plugins.intellij.net), I get this error:

**Fatal error:** Call to a member function on a non-object in `/var/www/plugins.intellij.net/plugin/edit/index.php` on line **291**

Also, the site is very very slow, is this still the official way of updating plugins?

Hello Hani,

One week later, still getting this error!

Could you please e-mail the file you're trying to upload to [plugins-admin@jetbrains.com](mailto:plugins-admin@jetbrains.com)

so that we could investigate the problem?
