Hi,

I am new to TeamCity and was wondering if anyone has tried AccuRev plug in under TeamCity 5. Does it only work under 4? When I try to select AccuRev as the VCS the server never allows me to save AccuRev as my VCS.

Thanks,

No worries! I've figured it out myself. Cheers to all!

Out of curiosity, what did you have to do? We're currently using AccuRev with TeamCity 4.5 and are curious as to how much work an upgrade will entail...
