

[1602] Features are disabled under...

[sean kearon](#) 190 posts since

Apr 5, 2004

R#'s features are disabled after I've installed 1602. In previous versions I could unload and reload R# from VS Tools | Add-in Manager, but this is no longer available. Is there anything else I can try?

I also get the following exception (JIRA not allowing submit right now):

An item with the same key has already been added.

--- EXCEPTION #1/2 [ArgumentException]

Message = "An item with the same key has already been added."

ExceptionPath = Root.InnerException

Hello,

I think this exception is unrelated. Fixed, anyway.

Hello,

R#5 is not an Add-In anymore, but rather a first-class package, so there's no VS-standard unload option for it. We got Suspend/Resume functionality exposed through, for example, Visual Studio Options dialog. But I do not think this could really be the case.

Without the add-in, there're much fewer things to fail on startup. Anyway...

Does uninstall+reinstall (repair) help? Is the package listed in Help/About?

Does Visual Studio startup log (see commandline) list any related errors?
