

# Reopen Recent Projects - max list size...

Hi,

I would love the idea of configuring somewhere the maximum list size for the File -> Reopen projects list.

The way I work I keep and maintain very many projects at a time and the list is currently to a small number, hence I have to go and find the less recent projects the long way around...

How does it sound?

Even better, a recent projects editor that you can use to selectively delete items. Right now all we have is File -> Reopen -> Clear List.
