Sep 28, 2006

The plugin page shows that the latest version is compatible thru idea v94, but the plugin manager shows it as incompatible. Is this an error in the plugin config or do we really not have ruby for the latest maia?

Hello Barry,

The plugin page shows that the latest version is compatible thru idea v94, but the plugin manager shows it as incompatible. Is this an error in the plugin config or do we really not have ruby for the latest maia?

You really do not. An updated plugin will be released together with the next Maia EAP.
