

How to find notification rules

Ben 19 posts since

Sep 30, 2008

I am trying to find the list of a user's watched builds. I have a `NotificationRulesManager`, with which I can (I think) get the list of `notification rules` using `getUserNotificationRules`, but to do so I need some magic strings.

Where can I find the values for `notifierType`?

I have tried things like "BUILD_FAILED", "ALL", "*" but with no success.

Thanks

Note: If there's a better way to get the watched builds list, please let me know

Please take a look at `jetbrains.buildServer.status.StatusProvider::getWatchedBuildTypes()`

You still need to know `notifier type` which rules you want to use. `Notifier type` is a name of `notifier plugin`, for Email `notifier` it is "email", for Jabber - "jabber". Other

How to find notification rules

notifier plugins can use their own names. To obtain list of registered notifiers use
`jetbrains.buildServer.notification.NotificatorRegistry::getNotificators()`

Okay, great I'll go ahead with that

(Actually [StatusProvider appears to be deprecated](#)), but hopefully the notifier names is all I needed

Thanks
