

Presentation Question

Mar 19, 2010

How do I move the tools/deployment/upload icon to the main toolbar?

I tried File -> Settings -> Menus and Toolbars but couldn't move it from there.

It would be very convenient to have this on the toolbar so I can have "1 click" server upload.

Many thanks!

I don't think it's possible to customize your toolbars. I saw a feature request in the track for creating a shortcut key for upload/download ftp though

Since EAP build 94.430 you can easily place deployment buttons on the toolbar:

- Open File | Settings
- Click 'Menus and Toolbars'
- Expand 'Main toolbar' node
- Click on the item you want add actions after
- Click 'Add after'

Presentation Question

- Popup is shown, there you expand 'Plugins', then 'Remote Host Access'
- Select the action(s) you want (i.e. Upload to Remote Host)
- Close the dialogs

Changing actions shortcuts is also easy:

- Open File | Settings
- Click 'Keymap'
- If you haven't customized shortcuts yet, click 'Copy' button to create your own profile
- Expand 'Plugins' node, then 'Remote Host Access'
- Click on the action node and click 'Add keyboard shortcut' at the right.

Regards,

Kirill

You need to press "copy" button near default keymap name to be able to customize it further.
