

Suggestion: Add ReSharper's KeyMap to...

[Felix Alcalá](#) 1 posts since

Hi,

I was trying to make PhpStorm shortcuts behave like ReSharper's. I've been using ReSharper for several years now and I like PhpStorm. Now I'd like to use the same shortcuts, of course. So, I'd like to use "Ctrl+R, R" for renaming a variable and so on. I did not find a keymap "ReSharper" but only the keymap "Visual Studio".

The problem is that the keymap "Visual Studio" is different from the real Visual Studio with ReSharper.

Some examples:

- * "Visual Studio" has "Refactor Rename" as Shift+F6, while real ReSharper uses "Ctrl+R, R".
- * "Surround with..." command can be invoked with "Ctrl+Alt+T" in the KeyMap "Visual Studio" while in ReSharper the shortcut is "Ctrl+E, U".

I'd really love to have ReSharper's keymap.

Thanks,

Felix

Suggestion: Add ReSharper's KeyMap to...

Aug 22, 2002 1. **Re: Suggestion: Add ReSharper's KeyMap to PphStorm** Mar 21, 2010 11:53 AM

Just press "copy" on default VS keymap and edit it as you like.

And may be even share it with other users 😊

We can't allocate any resources on designing keymaps or color schemes in any not so distant future.
